

The error message you’re encountering indicates that the files in your project are marked as having been downloaded from the internet, which places them in a restricted zone on your system. This happens due to the "Mark of the Web" (MOTW) that Windows applies to files downloaded from external sources. Here’s how you can resolve the issue:

Option 1: Using File Properties (Manual Approach)

1. **Locate the Files:** Find the `.resx` files mentioned in the error message in your project directory.
2. **Remove MOTW:**
 - o Right-click on each file, choose **Properties**.
 - o If you see an "Unblock" checkbox at the bottom of the **General** tab, check it and click **OK**.
 - o Repeat for all affected files.

Option 2: Using PowerShell (Batch Approach)

If you have many files, you can use PowerShell to remove the MOTW from all of them at once:

1. Open **PowerShell** as Administrator.
2. Navigate to the project folder:
3. `cd "C:\Path\To\Your\Project"`
4. Run the following command to unblock all files in the folder:
5. `Get-ChildItem -Path . -Recurse | Unblock-File`

Option 2: Using PowerShell (Batch Approach)

If you have many files, you can use PowerShell to remove the MOTW from all of them at once:

1. Open **PowerShell** as Administrator.
2. Navigate to the project folder:

powershell

Copy code

```
cd "C:\Path\To\Your\Project"
```

3. Run the following command to unblock all files in the folder:

powershell

Copy code

```
Get-ChildItem -Path . -Recurse | Unblock-File
```

Option 3: Transfer Files Without MOTW

When transferring the files from your computer to the school computer, you can use a method that avoids MOTW:

- Compress the project folder into a `.zip` file before transferring.
- Extract the `.zip` file on the school computer. Extracted files typically do not retain MOTW.

Troubleshooting

- If none of the above works, confirm that you have administrative privileges on the school computer and that no group policies restrict file access.
- Ensure your project is stored on a local drive rather than a network location that might impose additional restrictions.
